How is climate change affecting people living in the Arctic?

Full text

Many people living on the coast will face more and more severe storms as sea levels rise and less sea ice allows higher waves to reach the shore.

Many indigenous peoples depend on hunting polar bear, walrus, seals and caribou. They herd reindeer, fish and gather food to support the local economy and these activities form the basis of their cultural and social identity. Changes in where animals live, meaning a less reliable food supply, and more difficult travel due to varying ice and weather conditions, are causing serious challenges to human health.

Reports from the indigenous people about the effects of climate change on their lives provide very important information to those studying climate change.

Gap-fill activity

How is climate change affecting the people living in the Arctic?

Answers
